# Furniture Sector

Source From Egypt

# Furniture Egypt Market

The Egyptian furniture industry is considered one of the most flourishing industrial sectors in Egypt that was able to increase its exports dramatically during the past decade.

The furniture sector started to organize and develop its structure including factories, workshops, and labor force. Moreover the furniture sector is now giving more attention to the complementary and feeding industries to the furniture industry in order to increase the competitive of the furniture product.

# Furniture Styles.

## **Classic Furniture:**

This style of furniture features luxurious pieces in sophisticated designs. It requires highly skilled workers with an eye for details.

## **Modern Furniture:**

This particular style of furniture is largely known for its simplicity. It is usually easy to dismantle and reassemble, making it easy to transport and ship.

## **Ethnic Furniture:**

This style of furniture is inspired by the heritage and culture of the corresponding community. It includes but is not limited to Arabesque, Nubian and Ottoman-inspired furniture.

## **Contemporary Furniture:**

This style of furniture achieves a perfect balance between simplicity and elegance. It combines the luxury of the classic style with the functionality of the modern style.
