

DOORTECH  
EGYPT

YOUR GATE TO THE FUTURE

---

# About us:

DOORTECH IS AN EGYPTIAN COMPANY FOUNDED IN 2013

By placing great importance on the design, production and sales of doors it has revolutionized the residential & commercial market's conventional approach and system solutions. It is the first company to provide a complete manufacturing of wooden doors systems with the intent to satisfy customer needs and demands. In today's market, doors are not simply shields from the outside world keeping us only secure, they have become a pivotal aspect in designing a space. Doors bring new solutions to restricted areas, allow protection from noises and fires, all whilst still incorporating beautiful and elegant designs. They complement a space/home with their beauty and utility.

The team, led by founder Mr. Raouf Dayoub, places importance on innovation, functionality and creative designs. Each door is expertly produced using high-tech machinery and quality raw materials imported from Europe, coupled with constant research and market awareness. Ultimately aiming at providing customers with products based on excellence and reliability.

# Customers served:

**<2500**

Residential (villas & Houses)

**<100**

Commercial (contractors & developing companies)

**Since 2017**

Authorized distribution in Iraq

doors/month

<45000  
doors/year

# Mission:

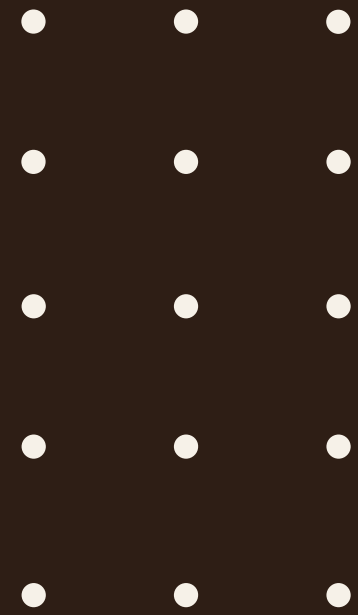

“DoorTech’s mission is to deliver quality products using market expertise and advanced industrial techniques whilst remaining affordable and placing customer satisfaction at the foreground.”

# Vision:

“To set a new standard of excellence for door manufacturing that emphasizes on innovation, comfort and design; continuing, at the same time, to grow as a company built on ethics.”

# Our responsibilities:

# Quality Assurance:

We have executed here at DOORTECH, a Quality assurance System throughout the company to fulfill the requirements of the highest local Quality standards, and which covers all aspects of business operations. It is the management's responsibility to pledge that this policy is understood, executed and maintained at all levels and under all circumstances within DOORTECH. The following policy statement applies to all services offered by DOORTECH.

To proffer the best quality craftsmanship and service to meet our obligation to our customers. Our policy guarantees that:

All aspects of legal obligations are followed up and fulfilled.

All staff, at all levels are aware of the commitment to delivering products and services in conjunction with the accomplished quality assurance system and the employees are considered an inherent part of that system.

Subcontractors and Suppliers cooperating with the company understand and acquiesce with all aspects of this system

**Intertek**

## Environmental Protection:

DOORTECH is fully aware of the significance of Protection of the environment and ensures that fabrication operations are conducted in such a way as to reduce any unnecessary environmental damage. The company ensures the commitment and pursuit of supplying construction services, materials and equipment complying with highest Standards and Contract specifications.

## Human resource policy:

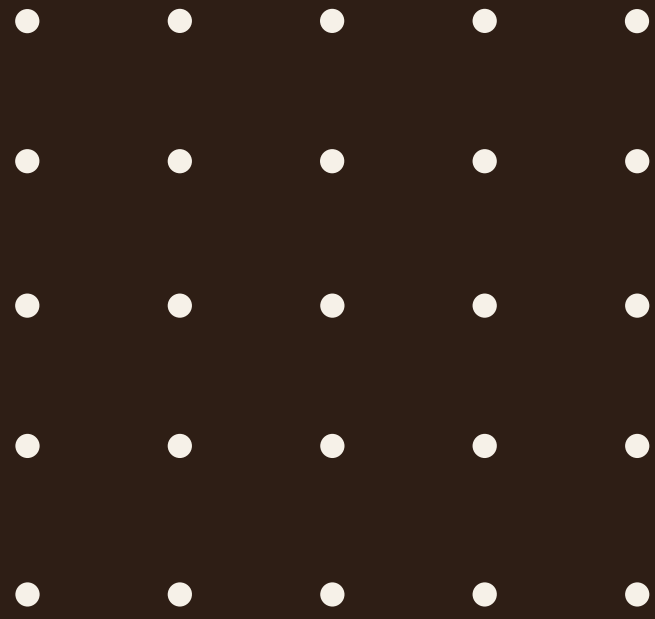

Staff Development/Training DOORTECH management recognizes a responsibility to build up the staff's chance to develop skills and abilities for utmost performance within the position and for career promotion within the company. DOORTECH maintains a permanent coordination with both chambers of commerce and industry to benefit the comprehensive variety of courses they arrange.

## Safety measures:

Our main targets are to ensure the safety of our staff in occupational environments and to ensure the safe and knowledgeable use of hazardous materials and machines that are used in fabrication process.
